1997 PCG Household File

Codebook

Number of Variables

311

HHREL97   **"PCG HOUSEHOLD FILE RELEASE NUMBER 97"**   **NUM(1.0)**
Release number

For Release 3 we have added the PSID Main Study Identifiers Family Interview ID Number and Sequence Number for 1997.

The May 2019 release of the PCG-HH file includes one interview record per primary caregiver. This is a file structure change compared to previous releases, which included records from multiple interviews taken with the same primary caregiver. These multiple interviews occurred when one primary caregiver cared for children observed in two or more family units during the preceding PSID Core interview.

We used the following decision rules to retain one interview in the following priority order:

a)   Retain the PCG-HH record associated with the greatest number of children in a given PSID Core family unit.

b)   Retain the PCG-HH record corresponding to the family unit observed earlier in the PSID Core interview field period.

c)   Retain the PCG-HH record with the most non-missing data (Note: this was decided based on a case-by-case comparison).
